Cloud Financial Management for Construction

Built on the bedrock of over 50 years of construction experience

Sage Intacct for Construction is the only native cloud solution that pairs over 50 years of experience in construction with the largest partner network in the industry. More than 50,000 construction customers rely on Sage for real-time visibility, reporting, insights, and integrations with common construction

software such as Procore, Autodesk Navisworks, and any other system your team relies on for project management, estimating, equipment management, and more. With on-demand job costing, integrated payroll, reports, and automation, Sage Intacct for Construction is helping customers drive up to 25% increased profit.

A Financial Management solution built for construction

With decades of experience in the industry, we speak the language of construction and know the challenges that contractors face. As your organization grows, manual processes drain your productivity, and it becomes exponentially difficult to analyze your business. We've built our system to handle all your financial and project management needs, as well as the architecture to sync your critical system as you expand your tech stack. We provide customizable reporting features, multi-entity consolidation, a dimensional general ledger, accounts payable automation, comprehensive job cost tracking and billing, automated revenue recognition, easy-to-use dashboards, and an integrated payroll. To ensure your success, we have the largest and most experienced partner network in the industry to guide you along the way.

Sage

Access your Financial and Operational data in real-time

Construction leaders need visibility into financial and operational metrics to make timely, data-driven decisions for budgets, job progress, staffing, subcontractors, and more. With Sage Intacct's on-demand reporting, you can measure the performance of your projects for financial, operational, and outcome metrics against historical data. Every transaction in the system is tagged with dimensions, so finance teams can sort, view, filter, and report on the specific information they need, whenever they need, with a few clicks of a button.

Integrate with common construction software with a true cloud technology

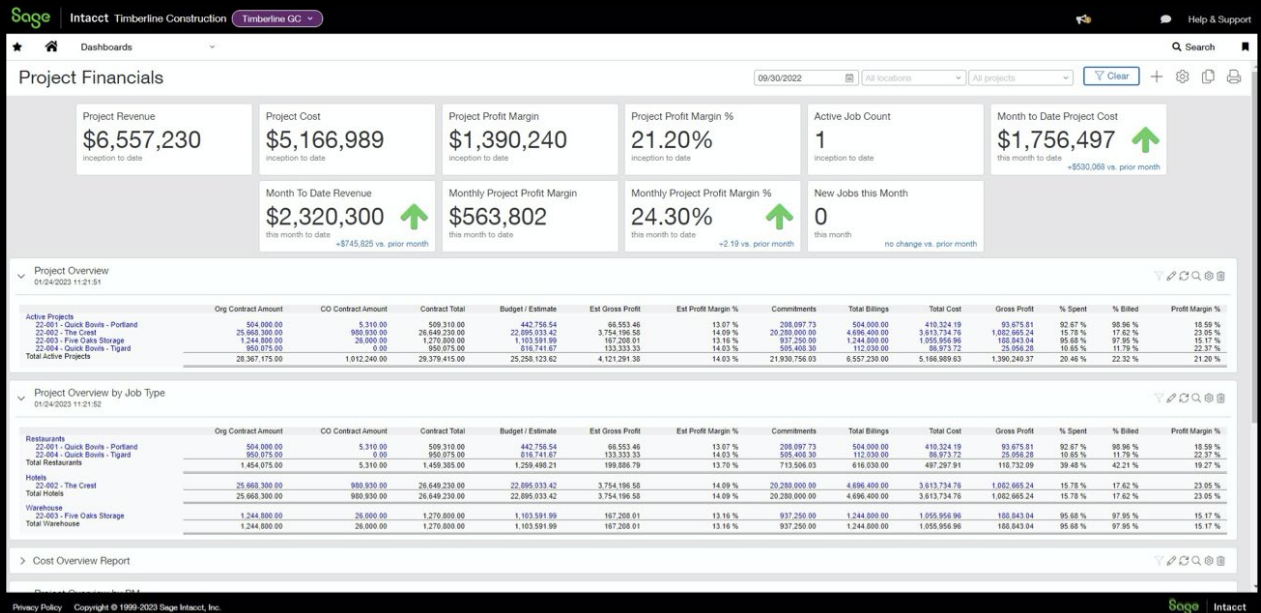

As an innovator in the cloud space, Sage Intacct for Construction was built on a true cloud model. We deliver multi-tenant financial management, on a platform built for finance. This allows all users to be on the same version, without complicated and expensive

upgrades. Our open API enables connections to existing or future systems like Procore, Autodesk Navisworks, and others. This means you can instantly access key data from the field, job tracking modules, payroll, budgeting, customer relationship management solutions, and more. With Sage Intacct you can integrate this data with your project financials and track the metrics critical to your organization's financial and operational success.

Get the full picture of your construction projects

Along with Sage Intacct for Construction, take advantage of our add-on modules for estimating, field operations, payments, and more. Sage's estimating tool will enable you to precisely calculate all aspects of your bid including labor, materials, subcontractor bids, overhead, and profit; and send those details to your job cost accounting with a click of a button. With Sage Field Operations, you can simplify service operations and reduce time-to-invoice by tracking time, materials, and more in your office or at a job site.

Sage Intacct dashboards provide visibility into critical metrics that drive your mission—like role-based dashboards, outcome metrics, and more.

Capabilities include:

- Customizable reporting and dashboards
- Multi-entity and global consolidations
- Project costing and billing
- Dimensional General Ledger
- Budgeting and planning
- Accounts payable
- Accounts receivable
- Fixed assets
- Cash management
- Integrated cloud payroll
- Purchasing
- Revenue recognition
- Spend management
- Time and expense
- Allocations management

“Sage Intacct Construction streamlines processes so with the time you gain back, you can actually look at the data, understand it, and make fact-based decisions, which is the most important aspect.”
