CASE STUDY:

Jump Juice Bars

About Jump Juice Bars

Founded in Waterford in 2003, Jump Juice Bars is a chain of 24 juice bars nationwide, employing more than 150 people.

The chain offers made-to-order juices and smoothies which focus on product quality and the customer experience. The company is headquartered in Cork and has built a strong reputation for its wellness credentials. It ensures that it continues to lead the way in the dynamic food-to-go market.

Overview

Jump Juice Bars was established by Claire and Charlie Scanlan in 2003 and has grown from strength to strength since then.

Employing over 150 people across their network of 24 juice bars nationwide, Jump Juice Bars is the leading smoothie and juice bar and with Jump Juice Direct the company delivers a range of cold pressed juices and smoothies to homes and offices.

To support the business's ambitious growth plans, Jump Juice Bars looked for a technology solution to enable growth and reduce time spent on manual administration and financial tasks. To meet these needs, Jump Juice Bars partnered with Envisage to deploy its sruu solution.

"Having implemented this system for our existing stores we are already able to see savings in terms of time and money."

The Solution

Envisage installed its financial and business management software, sruu, to streamline financial administrative processes, improve business performance and facilitate Jump Juice Bars' expansion.

With an initial investment of €40,000, the sruu software integrates the Sage 200 accounting software and its Captiva EPoS solution, driving internal efficiencies through automation.

The integration with Envisage's sruu software and Sage 200 allows Jump Juice Bars to generate more granular and accurate financial statements. This has enabled employees to proactively make business decisions and reduce the errors and time taken to produce management accounts and improve overall efficiency.

Crucial data flows seamlessly through the centralised and fully automated database, enabling employees to access data from anywhere.

sruu also eliminates manual input of sales data and speeds up the supplier invoice entry process, saving up to 40 work hours per month, allowing employees more time to grow the business and focus on core tasks.

"We talked to a number of different business software providers to get help with our digital transformation, but when we spoke to the team at Envisage, we knew we were in good hands.

"The software is one part of the experience, but the team behind the software is key, and the Envisage team have shown immense knowledge in this aspect."

Charlie Scanlan, Managing Director and Owner, Jump Juice Bars

The Outcome

SUBSTANTIAL TIME SAVINGS

Employees save up to 40 work hours per month – eliminating manual input of sales data and speeding up the supplier invoice.

SEAMLESS DATA FLOW

The centralised and fully automated database allows employees to access and analyse data from anywhere.

INCREASED EFFICIENCIES

Efficiencies gained from the Envisage solution allows for new stores to be added to the system without having to increase administrative staff.

ACCURATE FINANCIAL REPORTING

Employees can generate more granular and accurate financial statements.

REDUCTION IN ERRORS

The solution has led to a reduction in errors and time taken to produce management accounts.
